Status	Finished
Started	Thursday, 15 January 2026, 2:07 PM
Completed	Thursday, 15 January 2026, 2:19 PM
Duration	12 mins 23 secs
Grade	9.60 out of 10.00 (96%)

Question **1**

Correct

Mark 0.40 out of 0.40

Which two options of the following could be considered identity providers (IdP)?

- ☒ Social platforms such as Facebook and Google ✓
- ☐ Resource Servers
- ☐ SaaS services
- ☒ Custom built OpenID Connect systems ✓

Your answer is correct.

The correct answers are:

Social platforms such as Facebook and Google,

Custom built OpenID Connect systems

Question **2**

Correct

Mark 0.40 out of 0.40

From the kubernetes terminology, we can say that a pod:

- ☒ runs one or more containers ✓
- ☐ can span multiple nodes
- ☐ is managed by the operating system
- ☒ is the smallest deployment unit ✓

Your answer is correct.

The correct answers are:
is the smallest deployment unit,
runs one or more containers

Question **3**

Correct

Mark 0.40 out of 0.40

Why is loose coupling beneficial?

- ☐ Usually makes the system more scalable
- ☐ We should prefer strong coupling instead
- ☒ Facilitates better maintainability and extensibility ✓
- ☐ Improves network performance

Your answer is correct.

The correct answer is:
Facilitates better maintainability and extensibility

Question **4**

Correct

Mark 0.40 out of 0.40

Which of the following represent types of load balancers?

- ☐ NAT
- ☒ HTTP ✓
- ☒ DNS ✓
- ☒ TCP/UDP ✓

Your answer is correct.

The correct answers are:

HTTP,

TCP/UDP,

DNS

Question **5**

Correct

Mark 0.40 out of 0.40

Which of the following are HTTP idempotent methods?

- ☐ POST
- ☒ GET ✓
- ☒ PUT ✓
- ☒ HEAD ✓
- ☒ DELETE ✓

Your answer is correct.

The correct answers are:

GET,

HEAD,

DELETE,

PUT

Question **6**

Correct

Mark 0.40 out of 0.40

In which case is a streaming service more suitable than a queue?

- ☐ When it's enough if the message is processed by at least one client
- ☒ When we might want to replay previous messages/events ✓
- ☐ When we want to reduce the load on the clients
- ☐ When we don't want to store messages

Your answer is correct.

The correct answer is:

When we might want to replay previous messages/events

Question **7**

Incorrect

Mark 0.00 out of 0.40

Which is the correct order complexity wise in decreasing order for NoSQL database models?

- ☒ graph, columnar, document, key-value ✗
- ☐ graph, document, columnar, key-value
- ☐ document, columnar, key-value, graph
- ☐ key-value, document, columnar, graph

Your answer is incorrect.

The correct answer is:

graph, document, columnar, key-value

Question **8**

Correct

Mark 0.40 out of 0.40

Which of the following is not an application security process/technique?

- ☐ authorization
- ☐ authentication
- ☒ runtime checking ✓
- ☐ encryption
- ☐ input validation

Your answer is correct.

The correct answer is:
runtime checking

Question **9**

Correct

Mark 0.40 out of 0.40

Which of the following is not an Integration Service for cloud?

- ☐ API Gateways
- ☐ workflow services
- ☐ queues
- ☒ shared memory ✓
- ☐ publish/subscribe services

Your answer is correct.

The correct answer is:
shared memory

Question **10**

Correct

Mark 0.40 out of 0.40

Which are some of the concerns when adopting a serverless architecture?

- ☒ Your system might overload other dependencies ✓
- ☐ Your system might not be able to handle big workloads
- ☒ You might not have enough control ✓
- ☐ It will likely be more expensive than IaaS

Your answer is correct.

The correct answers are:

You might not have enough control,

Your system might overload other dependencies

Question **11**

Correct

Mark 0.40 out of 0.40

In a cloud environment the role of a load balancer is to:

- ☒ balance traffic across multiple targets ✓
- ☒ A/B testing ✓
- ☒ monitor the health of target resources ✓
- ☒ serve as a single point of entry ✓

Your answer is correct.

The correct answers are:

balance traffic across multiple targets,

monitor the health of target resources,

serve as a single point of entry,

A/B testing

Question **12**

Correct

Mark 0.40 out of 0.40

The CAP theorem referres to:

- ☒ Consistency, Availability, Partition Tolerance ✓
- ☐ Credibility, Accessibility, Partition Tolerance
- ☐ Capacity, Availability, Performance
- ☐ Credibility, Accessibility, Performance

Your answer is correct.

The correct answer is:

Consistency, Availability, Partition Tolerance

Question **13**

Correct

Mark 0.40 out of 0.40

Packet mirroring in cloud network can be useful for:

- ☒ bug testing ✓
- ☒ anomaly detection ✓
- ☐ boosting traffic performance
- ☒ security analysis ✓

Your answer is correct.

The correct answers are:

security analysis,

bug testing,

anomaly detection

Question **14**

Correct

Mark 0.40 out of 0.40

Which are two effective measures to improve infrastructure security?

- ☒ MFA for the development team ✓
- ☐ Implement OAuth 2.0
- ☒ Reduce the attack surface as much as possible ✓
- ☐ MFA for the users

Your answer is correct.

The correct answers are:

MFA for the development team,

Reduce the attack surface as much as possible

Question **15**

Correct

Mark 0.40 out of 0.40

Why are serverless databases usually NoSQL?

- ☐ Due to licensing limitations of SQL databases
- ☒ Because NoSQL databases usually scale better ✓
- ☐ Because data is non-relational in most cases anyway
- ☒ Because NoSQL databases are simpler (e.g. no ACID) ✓

Your answer is correct.

The correct answers are:

Because NoSQL databases usually scale better, Because NoSQL databases are simpler (e.g. no ACID)

Question **16**

Correct

Mark 0.40 out of 0.40

What are CDNs good for?

- ☐ reduce resources
- ☒ improve security ✓
- ☒ improve load times ✓
- ☒ optimize costs ✓

Your answer is correct.

The correct answers are:

improve load times,

optimize costs,

improve security

Question **17**

Correct

Mark 0.40 out of 0.40

FaaS stands for:

- ☐ Functionality as a service
- ☐ Frontend as a service
- ☒ Functions as a service ✓

Your answer is correct.

The correct answer is:

Functions as a service

Question **18**

Correct

Mark 0.40 out of 0.40

OAuth 2.0 is a(n):

- ☒ Authorization protocol ✓
- ☐ User management service
- ☐ Authentication protocol
- ☐ Multi-factor authentication service

Your answer is correct.

The correct answer is:
Authorization protocol

Question **19**

Correct

Mark 0.40 out of 0.40

Which of the following is the availability formula used in cloud environments?

- ☒ $\text{availability} = \text{uptime} / (\text{downtime} + \text{uptime})$ ✓
- ☐ $\text{availability} = \text{uptime} / \text{uptime} + \text{downtime}$
- ☐ $\text{availability} = \text{uptime} / \text{downtime}$
- ☐ $\text{availability} = \text{uptime} / \text{downtime} + \text{uptime}$

Your answer is correct.

The correct answer is:
 $\text{availability} = \text{uptime} / (\text{downtime} + \text{uptime})$

Question **20**

Correct

Mark 0.40 out of 0.40

A key-value database offers:

- ☒ high and consistent throughput ✓
- ☐ high but not consistent throughput
- ☒ ultra low and consistent latency ✓
- ☐ ultra low but not consistent latency

Your answer is correct.

The correct answers are:

ultra low and consistent latency,
high and consistent throughput

Question **21**

Correct

Mark 0.40 out of 0.40

What is the shared responsibility model?

- ☒ A model describing the responsibility of the cloud provider and the customer with regards to security 
- ☐ A framework for finding out the optimal security approach
- ☐ A requirement for the ISO 27001 standard
- ☐ A model describing the responsibility within a development team

Your answer is correct.

The correct answer is:

A model describing the responsibility of the cloud provider and the customer with regards to security

Question **22**

Correct

Mark 0.40 out of 0.40

Asymmetric encryption is suited for:

- ☐ High-performance compute
- ☒ Small payloads ✓
- ☒ Digital signatures (identity verification) ✓
- ☐ Large payloads

Your answer is correct.

The correct answers are:

Small payloads,

Digital signatures (identity verification)

Question **23**

Correct

Mark 0.40 out of 0.40

The relationship between TLS and SSL is:

- ☐ TLS is built on top of SSL
- ☐ They are not related
- ☐ TLS handles communication while SSL handles identity verification
- ☒ TLS is the successor of SSL ✓

Your answer is correct.

The correct answer is:

TLS is the successor of SSL

Question **24**

Correct

Mark 0.40 out of 0.40

The role of the hypervisor is to:

- ☐ manage users
- ☐ encrypt disk
- ☒ translate and limit instructions ✓
- ☒ create and manage guest machines ✓

Your answer is correct.

The correct answers are:

create and manage guest machines,
translate and limit instructions

Question **25**

Correct

Mark 0.40 out of 0.40

When can a service be considered serverless?

- ☒ When you don't have to setup any infrastructure ✓
- ☒ When you don't have to provision capacity ✓
- ☒ When you pay only for what you use ✓
- ☒ When the service can scale down to 0 ✓

Your answer is correct.

The correct answers are:

When you don't have to setup any infrastructure,

When you don't have to provision capacity,

When you pay only for what you use,

When the service can scale down to 0
